

## TeeShirtz Challenge

Code a shop page offering a selection of t-shirts and some widgets to **filter** the list.

You can choose **React or Vue** as a development framework.

Please code in a concise and modular way.

**Structure:** fixed header / sidebar / main-content

### Filters:

By price (an input range for example)

By brand (checkboxes)

By color (custom component)

A button to reset the filters

### Bonus:

- Provide an express/mongodb backend and expose a full Rest API to interact with the database.
- Improve the UI/UX

Happy Coding Squad !!!
